REMARKS		
This is UNEVALUATED Information		

1. On 20 April 1955, it was for the first time observed that construction material was shipped via Schaale and Moerla to the area west of Moerla, about 1 km west of the Flak Kaserne (8461) in Rudolstadt. It was determined that a new AAA emplacement was being built on a hill. A power line led from the construction site to Moerla and a two-core telephone line led to the Flak Kaserne. Local residents stated that two cantonment buildings were being built behind the village of Moerla. The following equipment was seen in the emplacement: 6 x 85-mm guns as observed in front of the Prinz-Eugen Kaserne (8462), 2 heavy machine guns, 1 range finder (Messgeraet) and 1 searchlight.
2. The AA emplacement in front of the Prinz-Eugen Kaserne was vacant.

Comment. The 497th AAA Regt of the XXVIII Gds Mtz Rifle Corps is believed to be stationed in Rudolstadt.
